

ASSURECARE

AI NEXT STRATEGY

New products and ideas to solve existing problems.
Expand the possibilities with new AI-powered tools.

INTRODUCING MC^2

Meet **MC²**. AI-Driven, Agentic, Ambient, Autonomic.
Future-Proofed Today!

MedCompass' successor **MC²**, is proto-AGI core.
It thinks, learns, evolves, predicts, and prescribes
with nuclear precision, turning data into
life-saving energy at c^2 speed.

VISION & MISSION: NEXT FRONTIER

VISION

To be the leader in the healthcare domain by seamlessly integrating AI-driven intelligence into our SaaS products and empowering our customers more effectively than before.

CORE VALUES

Build trust in the ecosystem and among partners and stakeholders through transparency, fairness, interpretability and free from harmful biases.

MISSION

Strategically deploy AI into MedCompass product line & in other SaaS products.

SCALABLE IMPACT

AI-DRIVEN
EFFICIENCY

2

ETHICAL &
EXPLAINABLE

3

1. ENHANCE PRODUCT VALUE

2. ELEVATE PATIENT EXPERIENCE

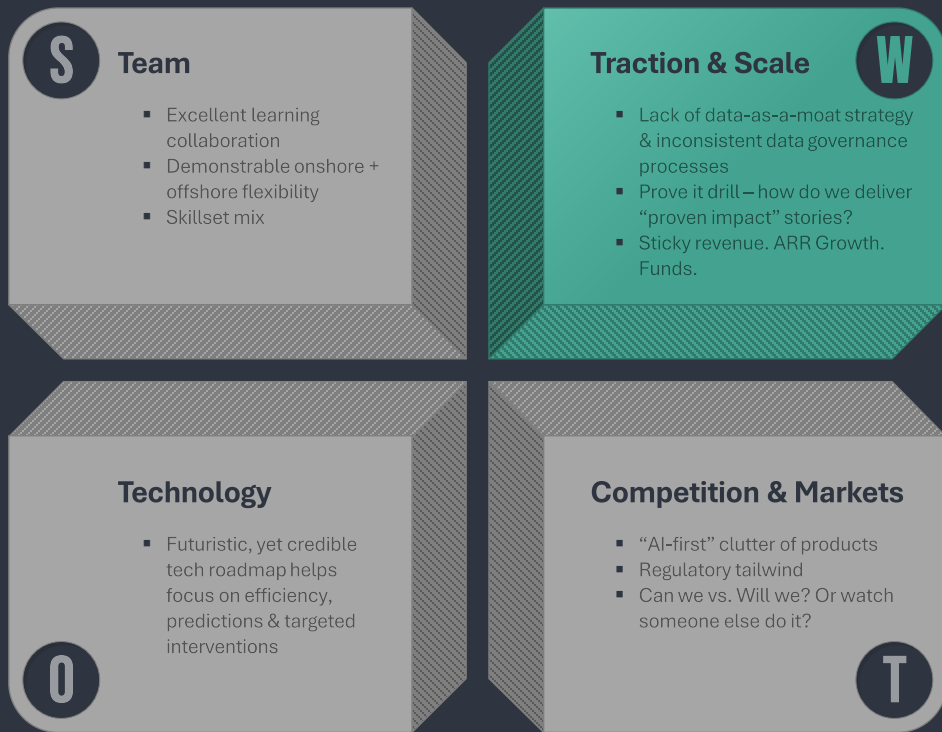

3. ENKINDLE INNOVATION

OUR STARTING POINT: CURRENT ASSESSMENT

AssureCare in 2025.

How can our legacy products win the AI era as a standout health tech company?

STRATEGIC TREE: BUILDING AI INTO MEDCOMPASS PRODUCTS

Foundation Enablers

- Data strategy
- Shuffling skill mix
- Establishing processes
- Security approved tools

AI-Enhanced Product Innovation

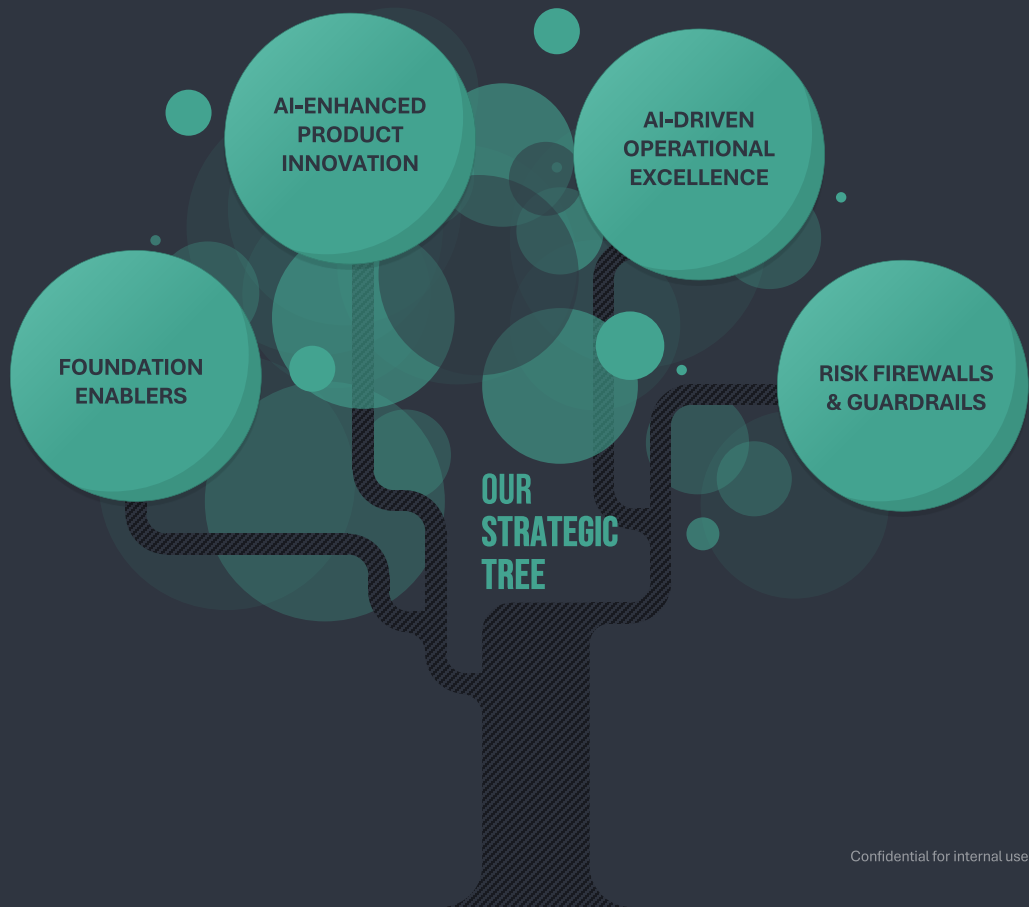

- Build AI enablers in our modules
- Build new products with AI-First

AI-Driven Operational Excellence

- Expedite development with AI tools
- Reimagining support systems

Risk Firewalls & Guardrails

- Regulatory firewalls
- IP & Copyrights
- Financial losses

STAGED APPROACH: BUILDING AI INTO MEDCOMPASS PRODUCTS

MC² will acquire AI capabilities in stages.

Task-Specific

Optimized for one function.

Rule-Based or Learned Patterns

Operates on predefined logic or trained ML models.

Limited Adaptability

Cannot transfer knowledge to unrelated tasks.

Scripted Autonomy

Follows workflows rather than true reasoning.

Human Oversight Required

Often needs guardrails to prevent errors.

Goal-Directed, Task-Specific

- Fraud detection (anomaly detection in billing patterns)
- Risk stratification (predicting high-cost patients)

Context-aware, Intelligent

- Ambient clinical documentation
- Real-time predictive alerts
- Behavioral nudges

Proactive, Scripted Autonomy

- Population surveillance
- True continuum of care
- Autonomous agents interacting across domains

MEET NURSE SUSIE

UM Super Agent.

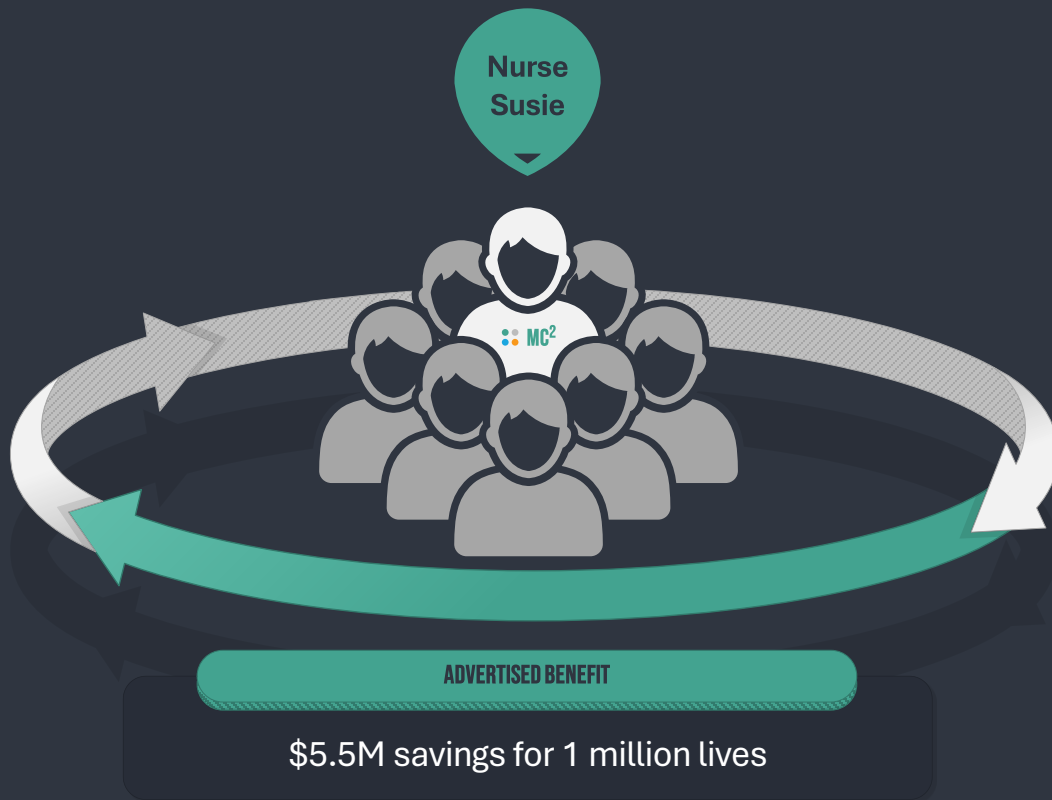

Specialized agentic intelligence that operates with nuclear precision for specific business processes supported by the current platform.

Supported by sub-agents to perform:

- Eligibility verification
- Intake Agent (OCR, Form validation)
- Guideline compliance
- OptimAlzer

Delivers:

- 70% efficiency in Intake staff
- 60% efficiency in first level reviewer
- 50% efficiency in physician capacity

MEET NURSE MARY

CM Super Agent.

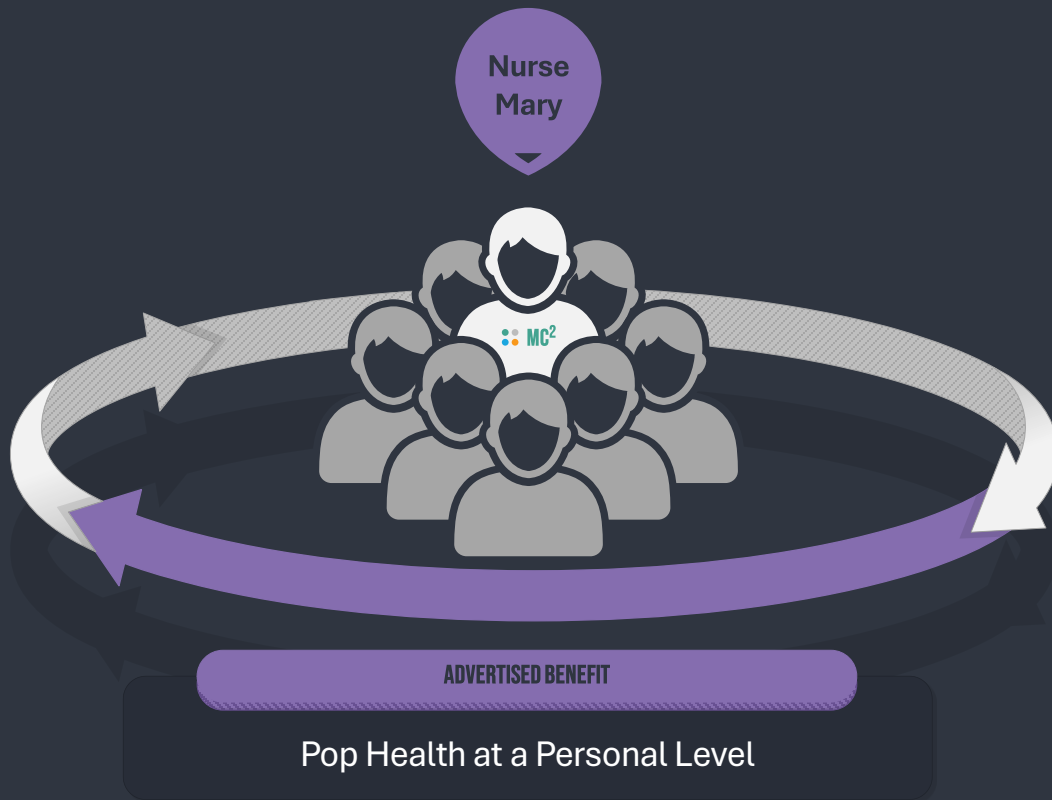

Specialized agentic intelligence that operates with nuclear precision for specific business processes supported by the current platform.

Supported by sub-agents to perform:

- Pharmacy Agent – Rx gaps
- Nutrition Agent – Nutrition Planning
- Mental Health Agent - Integrated
- Outreach Agent - Engagement
- Resource Connecting Agent - SDoH

Delivers:

- 15 mins per case savings

MEET NURSE GLORIA

Operations Manager. Drill Master. Compliance & Reporting Specialist.

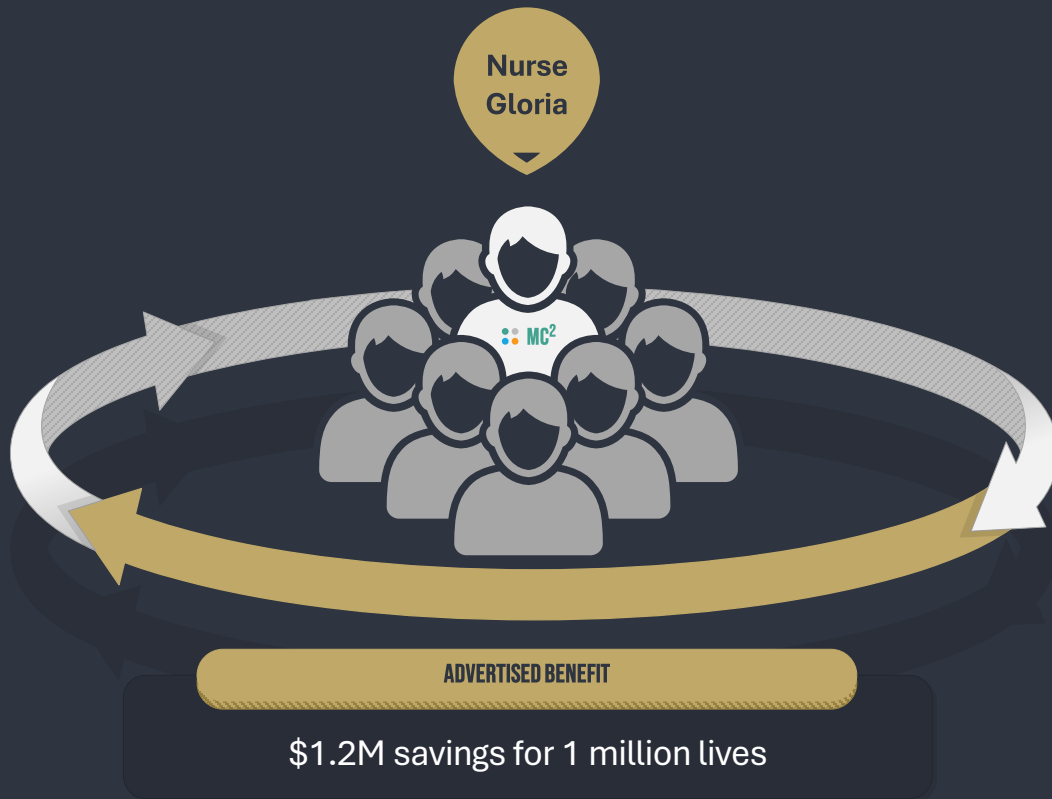

Specialized agentic intelligence that operates with nuclear precision for specific business processes supported by the current platform.

Supported by sub-agents to perform:

- Load balancer
- PTO manager

Delivers:

- 50% reduction in mid-level management

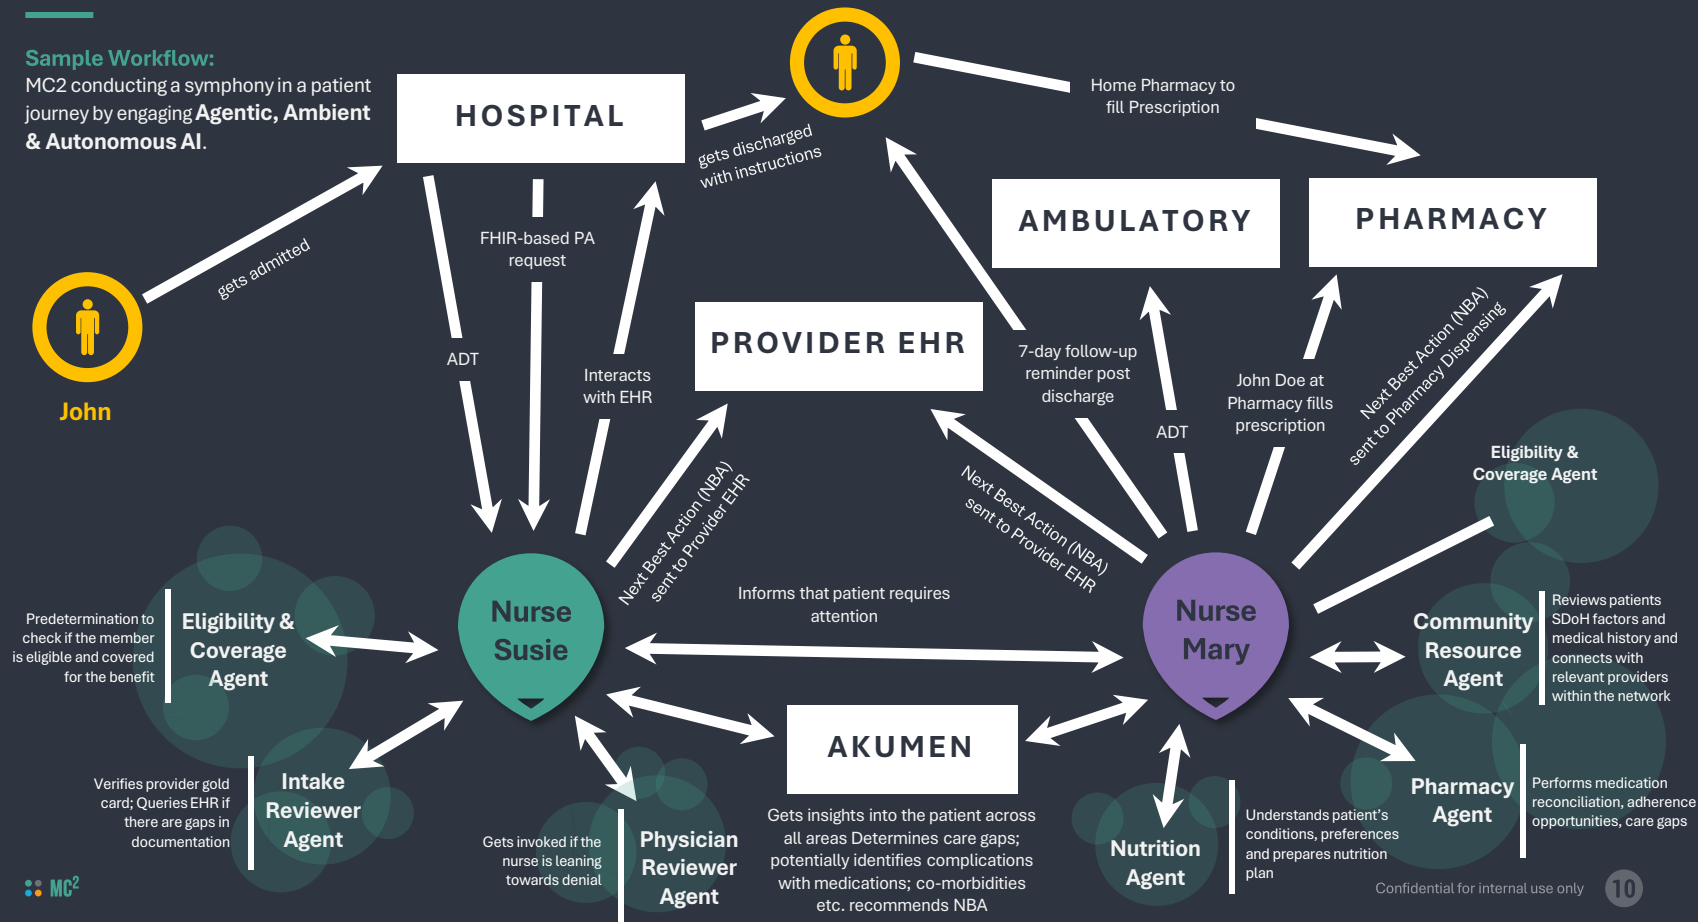

AGENTS IN ACTION: MC² AGENTS CONDUCTING A SYMPHONY

Sample Workflow:

MC2 conducting a symphony in a patient journey by engaging **Agentic, Ambient & Autonomous AI**.

AGENTS IN ACTION: AGENT-TO-AGENT COMMUNICATION

Sample Workflow:
Prior Auth Automation.

User Query:

Submit PA for CPT 99213 + MRI lumbar spine

Orchestrator Routes To:

RAG Agent

- Retrieves payer-specific guidelines

Coding Agent

- Validates ICD-10-CM: M54.5 → CPT linkage

SDOH Agent

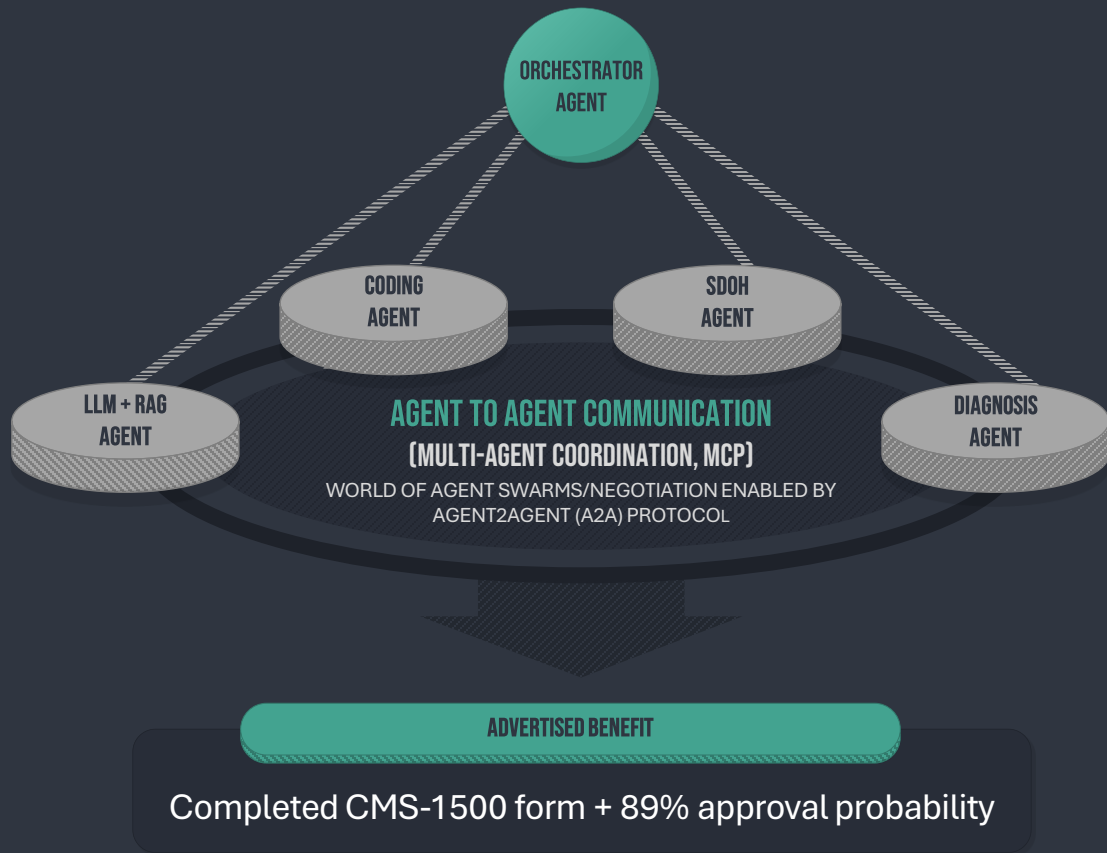

- Checks transportation barriers

Agents Negotiate:

- If MRI is denied, Diagnosis Agent provides clinical justification

Output:

Completed PA form + predicted approval probability

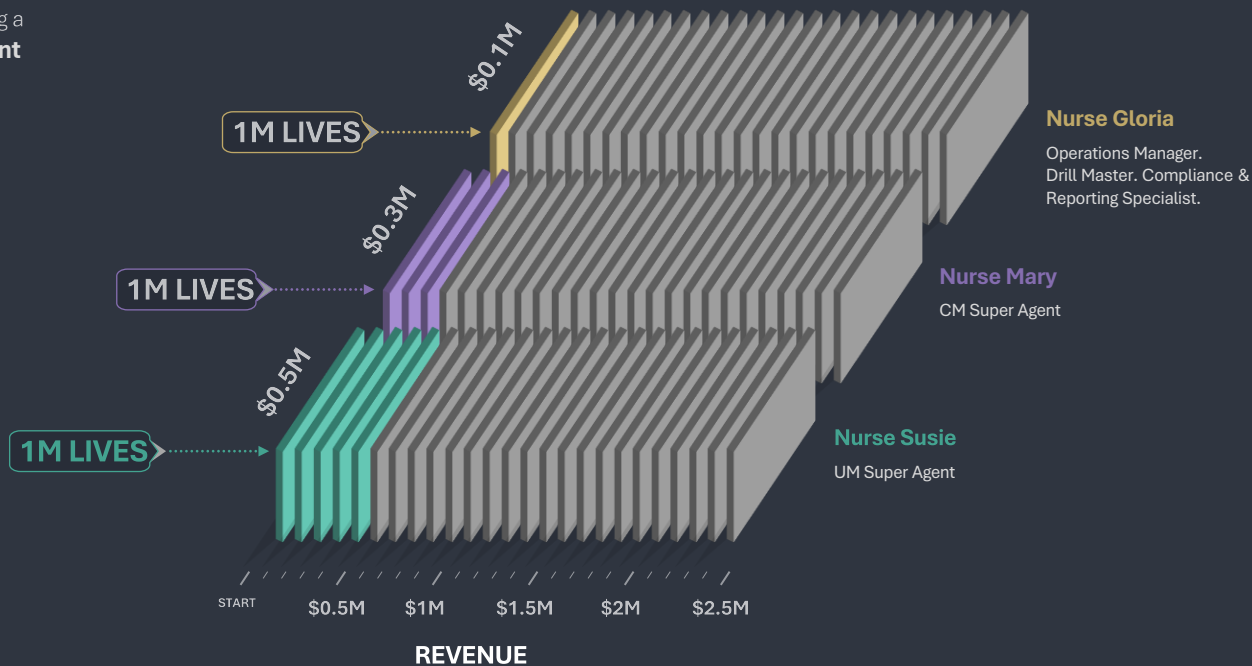

MARKET VALUE: 10% CAPTURED

\$0.9M for every 1 million lives.

We see the market scenario favoring a 10% market value captured by **Agent Susie**, **Agent Mary** and **Agent Gloria**.

IMPLEMENTATION TIMELINES

THE ASK
