Introducing Arta AI - Live event recap

## AI-Driven Wealth Management Revolution

 Arta AI democratizes private banking for 680 million affluent professionals globally, managing \$270 trillion in assets through a combination of deep financial expertise and advanced technology.

 The platform's "Wealth as a Service" offering enables partner banks and financial institutions to leverage Arta's technology through white-labeling or API integration.

 AI-powered agents, including investment planners, research analysts, and product specialists, provide on-demand portfolio analysis, investment ideas, and financial insights tailored to individual client needs.

## Personalization and Accessibility

 AI drives hyper-personalized financial planning by observing client behavior and needs, enabling advisors to deliver "segment of one" portfolios.

 Arta's platform breaks down institutional barriers like high costs and minimum investment requirements, making sophisticated financial products more accessible to a broader audience.

 An agentic voice model allows natural interaction with finances, providing insights on account performance, portfolio movements, and dividend information.

## Advanced Investment Strategies

 Arta's trading infrastructure, similar to quant funds, automates public market investing with strategies like robo-advisors, direct indexing, and quant models, personalized to individual risk tolerance.

 "Satellite strategies" enable clients to create custom baskets of securities based on specific themes, with the ability to add or remove stocks and set exact allocations.

## Comprehensive Wealth Solutions

 A high-yield cash reserve offers clients benefits from current high-interest rates and potential tax advantages in many states.

 Insurance strategies, including private placement life insurance, allow clients to invest in alternative assets and pass wealth to beneficiaries tax-free.

## AI-Powered Research and Analysis

 The research analyst feature utilizes multiple LLMs working together to create custom investment memos and satellite portfolios, ensuring thorough research without hallucinations.

 Arta AI adapts to changing financial situations, becoming more proactive by monitoring major life changes, investments, and market shifts, placing client interests at the center of its operations.

Target Audience

Target Investors (₹1 Crore plus) largely focus on the the bottom of the funnel features

# User experience

## Dashboard – Portfolio Snapshot & Actions

This screen gives the user a consolidated view of their portfolio, performance, and available actions.

### Key Sections:

- **Portfolio Value (top area)**  
Net worth across accounts. Shows returns in % and absolute terms.
- **Performance Graph**  
Interactive chart showing growth over time.
- **Goal Tracking (e.g., \$2M by 2050)**  
Progress against long-term financial goals.
- **Quick Actions (icons)**
  - Add Funds

- Invest
- Apply Strategy
- Withdraw
- **CTA: “Apply an Investment Strategy”**  
Guides users toward customizing their public market exposure.

## Categories of Investments – Explore Opportunities

This screen lets users explore and choose between different types of investment products on Arta.

Main Categories:

- **Public Markets**  
Invest in diversified strategies (like AI, Asia Leaders, etc.).
- **Alternatives**  
Private credit, private equity, venture, hedge funds.

- **Cash Management**  
High-yield cash and treasury options.
- **Structured Products**  
Custom notes, yield enhancements.

Each category is presented as a card with a short description and clickable CTA to explore further.

## Family Offices – Curated Offerings for the Ultra-Wealthy

This screen showcases investment offerings typically reserved for family offices.

Curated Opportunities:

- Private Credit
- Private Equity
- Venture Capital
- Hedge Funds
- Bespoke Strategies

Also includes:

- Minimum investment size info
- Disclaimers about eligibility
- CTA: Explore & Apply

This section communicates exclusivity and access to high-barrier products.

## Product Page – Product-Level Detail & Call to Action

This page gives a detailed view of an individual product or strategy.

Components:

- **Performance Metrics & Chart**  
Shows returns, volatility, risk score.
- **Product Description**  
What this strategy is, its methodology.

- **Suitability Labels**  
For long-term growth, income, etc.
- **CTA: Invest / Apply Strategy**  
Primary action button to start investing.

May also include fees, historical performance, and expected drawdowns.

## Product Analysis – Deep Dive into Performance

A breakdown-focused screen for advanced investors.

Sections:

- Rolling Returns
- Annual Performance
- Volatility Metrics
- Sector Exposure / Holdings

This helps users evaluate the robustness and diversification of the product before applying.

## Buying a Product – Streamlined CTA Flow

This is the transactional interface where users complete their investment.

Steps:

1. **Amount Entry**  
Input how much to invest.
2. **Funding Source Selection**  
Choose from linked bank, cash balance, etc.
3. **Risk Summary & Confirmation**  
Regulatory disclosures, risk flags.
4. **Final CTA: “Apply Strategy”**  
Completes the action.

The design is optimized for trust and completion speed.

## Strategies & Themes – Explore Investment Ideas

This view presents **Core** and **Satellite** investment strategies in a grid format, each card being clickable.

- **Core (Top Row):** Robo, Direct Indexing, Defensive Growth
- **Satellite (Bottom Grid):** Thematic exposure: AI, Asia, Gaming, Dividends, etc.

Each box is a selectable template to build a customized public market portfolio.

## Applying a Strategy – Editable Portfolio Templates

This page allows users to apply a strategy with the ability to edit and personalize allocations.

Features:

- **Editable Allocation Blocks**  
Users can adjust exposure to AI, Dividends, etc.
- **Suggested Allocations (Pre-filled)**  
Based on goals or risk appetite.
- **Impact on Goals / Risk**  
Live feedback as adjustments are made.
- **CTA: “Apply Strategy”**  
Locks in the selected allocation.

This screen blends flexibility with guidance, encouraging user control.

## AI for Performance Report

## Title: AI Reviews Your Portfolio Performance

### Features:

- Visual summary of portfolio growth over time.
- Breakdown of returns by asset classes or sectors.
- AI-generated insights into performance drivers (e.g., "Tech outperformed Energy by 12%").
- Callouts for underperforming holdings.
- Suggests rebalancing strategies if needed.

## AI Customized Reports for Portfolio Performance

### Title: Personalized Performance Snapshots

#### Features:

- Customized visual report cards tailored to user's investment mix.
- Comparison against benchmarks or user-set goals.
- Time period filters (YTD, 1Y, 5Y, etc.).
- Natural-language performance summary (e.g., "Your portfolio grew 8% in Q1").
- Shareable or downloadable reports.

# AI Explains Portfolio Movements

**Title:** Understand What's Driving Your Portfolio

**Features:**

- Natural-language breakdown of why certain holdings rose or fell.
- Event-impact table with:
  - **Company** (linked to profile)
  - **Event** (e.g., acquisition, earnings, sector trend)
  - **Impact** (positive/negative on portfolio)
- Real-time news/data synthesis.
- Makes portfolio insights more actionable.
- Ends with a conversational CTA: "Feel free to ask for more info."

## AI Analysis of Specific Financial Products

**Title:** AI Explains Any Financial Product

**Features:**

- Search bar to explore a mutual fund, stock, bond, or ETF.
- AI summarizes product in layman's terms.
- Key metrics (returns, risk level, holdings breakdown).
- Risk score and AI rating for suitability.
- Comparison to alternatives.

## AI Research Tools for Sectors & Stocks

**Title:** Deep Research Powered by AI

**Features:**

- Sector explorer with AI trends (e.g., "Healthcare seeing strong inflows").
- Stock-level analysis: news, fundamentals, forecasts.
- AI-generated SWOT or health scorecards.
- Interactive charts for historical performance.
- Drill-down tools for financial ratios and peer comparisons.

# AI Investment Planning Assistant

**Title:** Get a Tailored Investment Plan

**Features:**

- Simple Q&A wizard (age, goals, income, risk appetite).
- AI-generated asset allocation suggestion.
- Suggested products/funds per goal (e.g., Retirement, Education).
- Rebalancing reminders and progress tracking.
- Custom plan can be saved or shared.

# Natural Language Translations of Complex Data

The screenshot displays the Arta AI investment planner interface. At the top, the header reads "arta ai YOUR AI-POWERED INVESTMENT PLANNER". Below this, a section titled "Fund B" shows a table with "Attribute" and "Value", where "Weight" is listed as "14.00%".

An "Asset Class Breakdown:" section follows, with a table showing "Asset Class" and "Weight", where "Alternatives" is listed as "100.00%".

A chatbot bubble appears with the text: "Woah. That's a lot of stuff. Do you mind throwing that in simpler table for me or something?".

Below the chatbot, a message states: "Let me simplify that for you. Here's a simpler table summarizing your Investment Plan:". This is followed by a table with three columns: "Product", "Weight", and "Asset Class".

| Product                   | Weight | Asset Class                 |
|---------------------------|--------|-----------------------------|
| Income Bonds              | 5.00%  | Fixed Income                |
| Robo Growth               | 42.00% | Public Equity, Fixed Income |
| Fund A                    | 14.00% | Alternatives                |
| Defensive Growth Elevated | 23.00% | Public Equity               |
| Fund B                    | 14.00% | Alternatives                |

Below the table, a note reads: "This table shows the products in your Investment Plan, their respective weights, and the asset classes they belong to. Let me know if you have any further questions or if there's anything else".

On the right side of the interface, there is a sidebar with navigation options under "YOUR" and "EXPLORE" sections. The "YOUR" section includes "Port", "Arta", "Trans", and "Aut". The "EXPLORE" section includes "Guided", "Private Investments", "Cash Management", "Public Markets", and "Family Office Services". Below this is a "LOUNGE" section with "Lounge", "Connect", "New Group", and "Arta Club".

In the top right corner, there is a small video feed showing a person at a podium with the Arta logo, and a "US" flag icon.

**Title:** AI Makes Finance Understandable

**Features:**

- Converts charts, numbers, and ratios into plain English.
- Tooltips and toggles (e.g., "Explain this chart").
- AI chatbot answers "What does this mean?" type queries.
- Use-case: beginner investors can understand expert reports.

# Estimated Return Forecasts with AI

## Title: AI Predicts Your Potential Returns

### Features:

- Input: product or strategy, investment amount, timeline.
- Output: projected return range (best case, average, worst case).
- Confidence levels based on market data and AI models.
- Scenario builder with adjustable parameters.
- Clearly marked as “estimates, not guarantees.”

## Educational Aid for Jargon & Concepts

**Title:** Learn Financial Jargon Instantly

**Features:**

- Hover or tap to reveal definitions of technical terms.
- Mini-lessons for complex topics (e.g., "What is Sharpe Ratio?").
- AI chatbot answers questions like "What does NAV mean?"
- Tracks learning progress or saves user FAQs.
- Great for new or casual investors.
