Dezerv is changing wealth
management in India ►►***

DEZERV

Rise of new-age investors

“

A set of new wealth creators lack access to sophisticated wealth management. They are **digitally savvy, want transparency** and expect a seamless, high-quality experience. ”

- Traditional advisory models are faltering under the weight of changing investor expectations
- A new generation of CXOs, professionals, and founders backed by ESOPs, startup exits, and business income are now looking for active, tech-enabled wealth solutions.
- There is a huge opportunity to create a distinct platform that focuses on these wealth creators.

DEZERV

Tech + Human approach

“

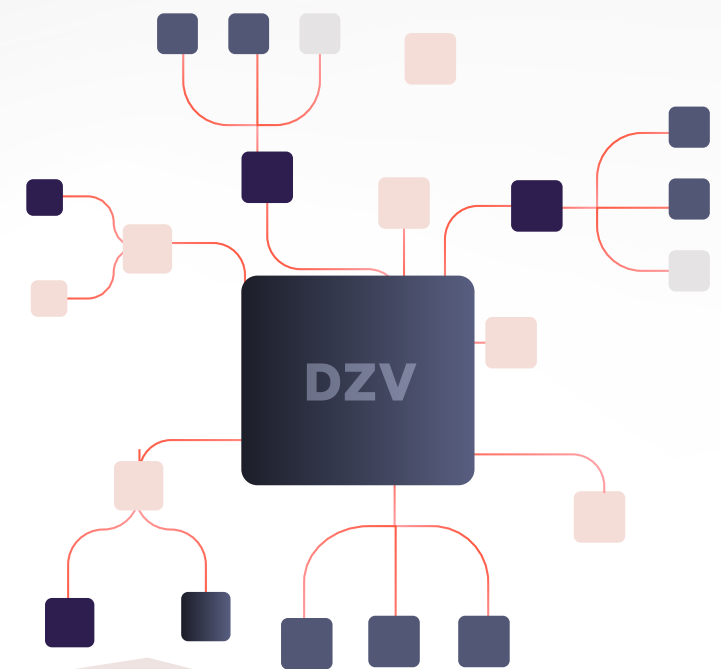

Our analysis of 5 lakh mutual fund portfolios on the Dezerv app revealed that investors are leaving out serious wealth creation opportunities on the table. ”

- Dezerv uses a tech-led, active management approach, drawing insights from over **2.2 million data points**.
- This methodology enables data-led forward-looking investment decisions. **Real-time monitoring** and swift rebalancing help clients preserve capital while staying market-relevant.

DEZERV

Centralised investment model

“

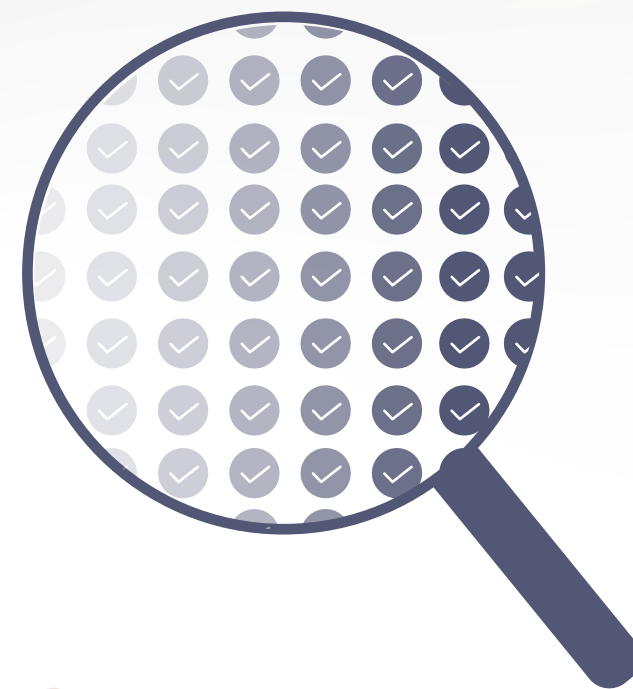

Through the Dezerv app when we analysed over **5 lakh mutual fund portfolios**, we realised significant wealth creation opportunities are being left on the table ”

- Investment calls are made centrally, by a data-driven team, not relationship managers, eliminating bias and standardising outcomes.
- Our business team members are three times more productive than industry peers, freed from operational tasks to focus on relationship building.

DEZERV

Scaling with precision

“

We digitally onboard all our clients and have **100% digital portfolio migration**, highlighting automation, accuracy and cost efficiency. ”

- All onboarding, execution and portfolio migration is fully digital.
- Machine Learning and Random Forest models back the portfolio construction strategy, ensuring forward-looking decisions with minimal manual intervention.

DEZERV

Unit economics that work

“

We have built scalable operations through **technology**, minimising manual interventions and **reducing costs significantly**. ”

- **Efficiency is built into Dezerv's model** with RMs managing higher AUMs, recurring revenues from aligned pricing and low churn.
- This **capital-efficient model** allows us to deliver personalisation at scale.

DEZERV

Poised for long-term play

“

For 65-70% of our clients, **Dezerv is the primary wealth manager.** We meet the needs of wealth creators who want their wealth managers to actively manage their portfolios without pushing products.”

- The **wealth-tech wave** in India is only beginning.
- With the blend of technology, trust and transparency, Dezerv is well-positioned for the next decade of growth in **India's wealth management landscape.**
