

Your Digital Family Office

Arta unifies your financial life to help you grow, protect, and enjoy your wealth.

Arta Finance

The ultra-rich manage their money and lives very differently.

They use a set of 'financial superpowers' to grow and protect their money. They access private markets, use sophisticated strategies, and have a dedicated team.

This isn't just about having more money; it's about having access to a different system. A system that has been historically unavailable to most.

Like they're playing a game on a whole other level.

Arta was built to give you that system.

We are a next-generation investment platform providing seamless access to public and private investment opportunities, along with expert financial services, previously reserved for institutions and the ultra-wealthy.

We unite deep tech and high finance to deliver your digital family office.

Now open globally to Accredited Investors.

The Three Pillars of Your Digital Family Office

Exclusive Access

Access exclusive investment opportunities in private and public markets, curated for Arta members.

AI-Powered Intelligence

Manage your portfolio with the help of AI that's purpose-built for wealth management.

Institutional Trust

Grow your wealth together within a secure, regulated framework backed by industry leaders.

Invest in opportunities previously out of reach.

Move beyond standard stocks and bonds. Build a diversified portfolio with institutional-grade assets once exclusive to the ultra-wealthy.

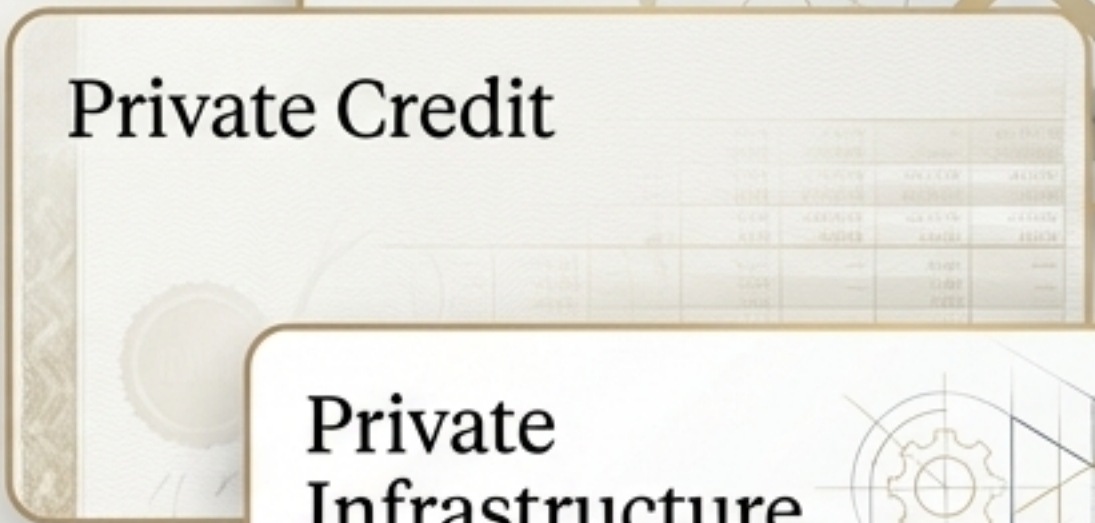

"Millennial and Gen Z investors are building diversified portfolios earlier by tapping into private market investments... assets once exclusive to high-net-worth investors."

Structured Products

Meet your AI Sidekick for investing.

Your Sidekick gives you a clear view of your holdings, instant performance comparisons, and easy-to-read stats that reveal how your portfolio measures up. Analyze, track, research, and question almost anything with just a conversation.

Intelligence that works the way you do.

Talk, Email, or WhatsApp

Communicate in your preferred style, in multiple languages (हिंदी, Português, 繁體中文, and more).

Automated Workflows

Turn recurring chores like monitoring markets or surfacing trends into automated tasks.

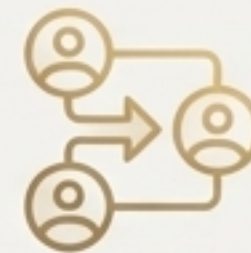

Simple Portfolio Uploads

Start in seconds by entering tickers, or upload a brokerage statement (PDF or screenshot).

Multi-Asset Support

Track global equities, ETFs, and major cryptocurrencies. (Mutual funds, private funds, and more coming soon).

Shared Learning

Gain ideas from shared portfolios by other Sidekick users, sharing only what you want to.

Choose the plan that's right for you.
