

Master Due Diligence Memorandum & Restructuring Plan

(Based on 94-Slide Deck & Strategic Re-Alignment)

DATE: November 12, 2025

SUBJECT: Comprehensive, Slide-by-Slide Restructuring of "AI-Powered Digital Family Office" Pitch.

STATUS: FINAL. This document incorporates all analysis, strategic pivots, and new branding (ARIA, Vora/Ascendum GTM, Hybrid B2B2C, Family Office OS) and supersedes all previous versions.

CRITICAL OVERVIEW: THE "REALITY CHECK" & NEW STORY

This plan is grounded in a "Reality Check" based on the

SLIDE_BY_SLIDE_CONTENT_ANALYSIS.md file.

- **WHAT WE ARE:** A **pre-revenue** company with a **working prototype** (India-market "Jarvis/Spark" AI), an **exclusive regulatory moat** (Vora/GIFT City), and an **exclusive distribution channel** (Vora/Ascendum KPS).
- **WHAT WE ARE NOT:** We are **not** a "live" platform with "\$42M AUM" or "27 clients."
- **THE NEW NARRATIVE:** We are a **Hybrid B2B2C** platform. Our long-term vision is a B2C "Digital Family Office" (like Arta). Our credible, "unfair" launch strategy is a **B2B2C "flanking maneuver"** leveraging our Vora/Ascendum assets.
- **THE BRAND:** Our AI ecosystem is unified under the brand **ARIA (AI Risk & Investment Advisor)**. She is the "virtuoso orchestrator" of wealth.
- **THE "WEDGE & EXPAND" STRATEGY:**
 1. **LAND (The "Wedge"):** We launch with our unique, "blue ocean" product: **The India Gateway Fund**. ARIA acts as the "AI Fund Manager" for the Vora AIF.
 2. **EXPAND (The "Hero"):** We launch **"The ARIA Data Engine."** ARIA becomes an "AI Sidekick" for CPAs and a "System of Record" for all clients by auto-reading K-1s, LPAs, etc.
 3. **DOMINATE (The "Vision"):** We launch the **"Global AI Advisor"** (via Alpaca/IBKR) and cross-sell this to the B2C and B2B2C clients we now own.

SLIDE-BY-SLIDE RESTRUCTURING PLAN (MASTER)

ACT 1: THE OPENING (Slides 1-8)

Objective: Establish the market disruption, our new brand (ARIA), and our credible, differentiated strategy.

Slide 1: Title Slide

- **Current Content:** "The AI-Powered Digital Family Office" + Fake trust badges (SOC2) + Fake media logos (Forbes, etc.).
- **Status:** ✗ [MAJOR REWRITE & RE-BRAND]

- **Problems:** Destroys credibility instantly. Lacks brand focus.
- **New Content:**
 - **Logo:** ARIA (using the "Ascendant Mark" logo).
 - **Title:** ARIA
 - **Subtitle:** The Virtuoso Intelligence for Global Wealth
 - **Three Moats (Re-branded):**
 1. ARIA'S "AI BRAIN" (Proprietary "Jarvis/Spark" Tech)
 2. EXCLUSIVE INDIA GATEWAY (Vora Ventures GIFT City AIF)
 3. HYBRID GTM (B2C Vision + B2B2C Vora/Ascendum Channel)
 - **Footer:** Backed by Vora Ventures | Prototype Operational

Slide 2: Executive Summary

- **Current Content:** "\$42M AUM," "27 HNW clients," "100% Live."
- **Status:** ✗ [MAJOR REWRITE]
- **Problems:** All traction claims are projections and must be purged.
- **New Content:**
 - **The Opportunity:** 46% of HNWI's are switching advisors, creating a once-in-a-generation disruption.
 - **The Problem:** HNWI's/NRI's are locked out of the \$5T India market and are drowning in complex (K-1) paperwork.
 - **Our Solution (The ARIA Platform):** A "Digital Family Office OS" with a hybrid GTM:
 - **B2C Vision:** A direct-to-consumer platform for tech-savvy HNWI's.
 - **B2B2C "Wedge":** An exclusive "AI Sidekick" for CPAs (via our Ascendum channel) to co-pilot their clients' wealth.
 - **Our Moat:** Exclusive Tech (ARIA) + Exclusive Regulation (Vora/GIFT) + Exclusive Distribution (Vora/Ascendum).
 - **The Ask:** Raising **\$5M Seed** to launch our "India Gateway Fund" (Phase 1) and build **"The ARIA Data Engine"** (Phase 2), targeting our first 50 CPAs and first 100 direct B2C clients.

Slide 3: Agenda & Roadmap

- **Current Content:** A 5-step journey.
- **Status:** ⦿ [REFRAME]
- **Problems:** Confusing and outdated.
- **New Content:** A new 5-Act Structure:
 - ACT 1: THE DISRUPTION (The "Why Now?")
 - ACT 2: THE ARIA STRATEGY (Our "Wedge & Expand" Plan)
 - ACT 3: THE UNFAIR ADVANTAGES (Our 3 Moats)
 - ACT 4: THE TECHNOLOGY (Prototype Validation)
 - ACT 5: THE BUSINESS (The \$5M Ask)

Slide 4: ACT 1 - The Hook & The Problem

- **Current Content:** Title card for "The Problem."
- **Status:** ✓ [KEEP AS-IS] (Content is accurate).

Slide 5: AI is the New Alpha - Stanford Study

- **Current Content:** 93% AI outperformance.
- **Status:** ✓ [KEEP AS-IS] (Excellent validation slide).
- **Action:** Confirm the citation for the "Stanford 2024" study.

Slide 6: Market Switching Now

- **Current Content:** 46% switching advisors (PwC data).
- **Status:** ✓ [KEEP AS-IS] (Excellent market timing slide).

Slide 7: The Three Failures (Alpha Gap)

- **Current Content:** Traditional vs. HNW Wants (Tax, Alts, India).
- **Status:** ☒ [KEEP AS-IS] (Perfect problem setup).

Slide 8: Transition Slide

- **Current Content:** "The Problem is Now, the Solution..."
- **Status:** ☐ [DELETE] (Redundant, replaced by new Act structure).

ACT 2: THE ARIA STRATEGY (Slides 9-14)

Objective: Introduce ARIA and our brilliant 3-phase "Wedge & Expand" strategy.

Slide 9: ACT 2 - The ARIA Strategy

- **Current Content:** "The Solution" title card.
- **Status:** ☐ [REPLACE]
- **New Content:**
 - **Title:** ACT 2: THE ARIA STRATEGY
 - **Subtitle:** Our "Family Office OS" to Land, Expand, and Dominate the HNW market.

Slide 10: ☐ [NEW SLIDE] - Introducing ARIA

- **Content:** This is the "ARIA: The Virtuoso Intelligence" brand slide. It introduces the "Orchestrator" and explains the acronym (AI Risk & Investment Advisor).
- **Purpose:** Establishes our brand and personifies the AI.

Slide 11: ☐ [NEW SLIDE] - The "Wedge & Expand" Strategy

- **Content:** This slide details the 3-Phase Strategy:
 1. **LAND (Wedge):** "India Gateway Fund" (AIF).
 2. **EXPAND (Hero): "The ARIA Data Engine"** (AI Document/K-1 Reader).
 3. **DOMINATE (Vision):** "Global AI Advisor" (The full B2C/B2B2C Platform).
- **Purpose:** This is the *new core* of the entire pitch. It explains our whole business model.

Slide 12: ☐ [NEW SLIDE] - Our B2B2C Distribution Moat

- **Content:** This slide shows the "Vora/Ascendum KPS Flywheel."
 - Shows: Vora -> Ascendum -> 1,000s of CPAs -> HNW Clients -> Our Platform.
- **Purpose:** This explains our *launch strategy*. It proves our *initial* GTM is credible and de-risked, giving us a "beachhead" for our wider B2C vision.

Slide 13: What We Are NOT (Positioning)

- **Current Content:** (Was a New Slide idea, now integrating old Slide 10).
- **Status:** ☐ [REFRAME SLIDE 10]
- **New Content (Based on old Slide 10):**
 - **Title:** What ARIA Is (And Is Not)
 - **Left Side (Old Model):** Single Advisor.
 - **Right Side (ARIA):** An "AI Investment Committee" of 68+ specialized agents (our "Jarvis/Spark" tech).
 - **Footer:** "ARIA is not a chatbot. She is a team of *executors*."

Slide 14: Our 3 Core Products

- **Current Content:** (Old Slide 11 - "Three Alpha Agents").
- **Status:** ☐ [REFRAME]
- **Problems:** "Agents" are not products. We must frame them as our 3-phase product suite.
- **New Content:**

1. **Product 1 (Wedge):** The "India Gateway Fund" (GIFT City AIF).
2. **Product 2 (Expand):** "The ARIA Data Engine" (AI Document Admin).
3. **Product 3 (Dominate):** The "US Tax Alpha Advisor" (US Brokerage).

ACT 3: THE UNFAIR ADVANTAGES (THE MOAT) (Slides 15-23)

Objective: Deep-dive into our 3 moats: India/GIFT, our Data Engine, and our Tech.

Slide 15: ACT 3 - The Unfair Advantages

- **Current Content:** "The Deep Dive" title card.
- **Status:** ○ [REPLACE]
- **New Content:**
 - **Title:** ACT 3: THE UNFAIR ADVANTAGES
 - **Subtitle:** Our "Triple Lock" Moat: Exclusive Regulation, Distribution, and Technology.

Slide 16: Moat 1 (Problem): India is Locked

- **Current Content:** (Old Slide 15 - "India: A \$5T Market, Locked by Red Tape").
- **Status:** ☑ [KEEP AS-IS] (Problem is well-defined).
- **Tweak:** Simplify jargon ("FPI," "STT") to "6-month setup," "30%+ tax drag."

Slide 17: Moat 1 (Solution): The India Gateway Fund

- **Current Content:** (Old Slide 16 - "Our Sol: The GIFT City Solution").
- **Status:** ✗ [MAJOR REWRITE]
- **Problems:** Vague. Doesn't explain the *mechanism* (AIF) or the *partner* (Vora).
- **New Content:**
 - **Title:** Moat 1: The Vora/GIFT City "India Gateway Fund"
 - **Left (The How):** A diagram: US Investor -> Our SEC-Compliant Platform -> Vora Ventures GIFT City AIF -> NSE/IFSC (Indian Stocks).
 - **Right (The Benefits):**
 - 0% Capital Gains Tax
 - USD-Denominated (No currency risk)
 - 48-Hour Onboarding (vs. 6 months)
 - EXCLUSIVE: "This partnership with Vora Ventures gives us a regulatory moat Arta Finance cannot copy."

Slide 18: ○ [NEW SLIDE] - ARIA as "AI Fund Manager"

- **Content:** This slide explains how our "Jarvis/Spark" tech (the Indian stock/MF models) is *not* a B2C tool.
- **Purpose:** It's the **in-house "AI Fund Manager"** for the AIF. The ARIA dashboard provides "look-through transparency" into the AI's "thoughts" (e.g., "ARIA sold HDFC this week, here's why..."). This slide is *critical* to connect our tech to our product.

Slide 19: Moat 2: "The ARIA Data Engine" (Hero Product)

- **Current Content:** (Old Slide 19 - "Alternative Asset Agent").
- **Status:** ○ [REFRAME]
- **Problems:** Old slide focused on "due diligence," which is what Arta does. Our "hero product" is *administrative*—solving the K-1/LPA nightmare.
- **New Content:**
 - **Title:** Moat 2: "The ARIA Data Engine" (Our B2B Hero)

- **The Problem:** "CPAs and Family Offices drown in 100s of non-standard K-1/LPA PDFs every tax season. It's a 200-hour, \$50k manual data-entry nightmare."
- **The Solution (ARIA as "Sidekick"):** "CPAs drag-and-drop all private asset documents into our secure engine. ARIA reads, understands, and dashboards all data instantly."
- **The "Land & Expand":** "This makes us the **System of Record** for the client's *entire* net worth, giving us the visibility to cross-sell our other products."

Slide 20: ● [NEW SLIDE] - ARIA: The "Digital Family Office OS"

- **Content:** This is the new slide based on the text you provided.
- **Title:** ARIA: The "Digital Family Office OS"
- **Subtitle:** How ARIA productizes the \$1M/year functions of a traditional UHNWI family office for the HNW/NRI market.
- **Content (Table Format):**

| Core Task | "Traditional" Model (The Pain) | The ARIA Platform (The Solution) |

| :--- | :--- | :--- |

| Alt Asset Reporting | Manual PDF/K-1 review. 3-6 month data lags. "Excel Hell." | Module 1 (Data): GenAI document ingestion. A real-time "Single Source of Truth." |

| Portfolio Risk Analysis | Impossible "look-through." Ignores "soft" risks. | Module 3 (Risk): AI-driven liquidity stress-testing. Cross-portfolio alerts. |

| Succession Planning | Static legal docs. 90% fail at wealth transfer. | Module 2 (Governance): AI-powered scenario modeling for tax/family changes. |

| Regulatory Compliance | Manual, high-cost (SEBI/FEMA). Opaque. | Module 3 (Risk): Automated, auditable "Compliance-as-a-Feature." |

- **Key Takeaway:** "We 'LAND' with **The ARIA Data Engine** (Module 1) and India Gateway (part of Module 3), then 'EXPAND' to become the central, indispensable OS for the family's entire 100-year journey."

Slide 21: Moat 3: The "US AI Advisor" (The Arta Competitor)

- **Current Content:** (Old Slide 18 - "Tax Alpha Agent").
- **Status:** ● [REFRAME]
- **Problems:** Presented as a current product. It's our Phase 3 product.
- **New Content:**
 - **Title:** Moat 3: Our Tech (Phase 3 "US AI Advisor")
 - **Left (The Problem):** "Traditional advisors miss 80% of tax-loss harvesting opportunities."
 - **Right (Our Solution):** (via Alpaca/IBKR): "ARIA's Tax Agent scans daily, adding a projected +1.8% in 'Tax Alpha' (JPM Research)."
 - **Footer:** "This is our 'Dominate' product. After we LAND with India and EXPAND with the Data Engine, we cross-sell this to manage the client's US assets."

Slide 22: ARIA's "Brain" (The Tech Stack)

- **Current Content:** (Old Slide 20 - "A Swarm of 20+ Agents").
- **Status:** ⬤ [REFRAME]
- **Problems:** Inconsistent number (20 vs. 68). Needs to connect to our open-source strategy.
- **New Content:**
 - **Title:** ARIA's "Brain": A Unified Agentic Stack
 - **Row 1 (The AI):** LangChain (Orchestrator) + GPT-4/Claude (Reasoning).
 - **Row 2 (The RAG "Memory"):** unstructured.io (PDFs/K-1s) + Chroma (Vector DB).
 - **Row 3 (The "Hands" - Execution):**
 - India: Vora GIFT City AIF (Live)
 - US: Alpaca (alpaca-py) + IBKR (ib_insync) (In Development).

Slide 23: ⬤ [NEW SLIDE] - US Technical Strategy: "Read vs. Execute"

- **Content:** This is the new slide detailing the strategy from our chat.
- **Title:** US Tech Strategy: The "Read vs. Execute" Model
- **Subtitle:** This explains our "broker-agnostic" approach for our Phase 2 & 3 products.
- **Block 1: "Phase 2: READ (Analysis)"**
 - Tool: **Plaid API**
 - Function: Connects to *any* broker (Schwab, Fidelity, etc.) for **READ-ONLY** data.
 - Product: Powers **"The ARIA Data Engine."** ARIA can see the client's entire net worth and analyze their K-1s, but *cannot* place trades on their Schwab account.
- **Block 2: "Phase 3: EXECUTE (Trading)"**
 - Tools: **Alpaca (alpaca-py) & IBKR (ib_insync)**
 - Function: These are *brokers*, not overlays. We integrate directly.
 - Product: Powers the **"US AI Advisor."** The client *must have or open an account* with these partners for ARIA to perform execution-based tasks like Tax-Loss Harvesting.
- **Key Takeaway:** "Our strategy is to 'READ' all their assets first (Phase 2), building trust and becoming the System of Record. Then we 'EXPAND' to 'EXECUTE' by inviting them to connect an API-ready brokerage account (Phase 3)."

ACT 4: VALIDATION (Slides 24-28)

Objective: Prove our claims with credible, real data, not fake traction.

(Note: Slide numbers are now shifted by +1 to accommodate the new slide)

Slide 24: ACT 4 - Technology Validation

- **Current Content:** (Old Slide 22 - "Act 4: The Proof").
- **Status:** ✗ [MAJOR REWRITE]
- **Problems:** All numbers are fake projections.
- **New Content:**
 - **Title:** ACT 4: Technology Validation (What's Real Today)
 - **This is NOT a projection.** This is our prototype's *actual* performance.
 - \$10M AUM -> ~\$50k Test Portfolio Managed
 - 27 Clients -> 5 Pilot Users (Internal)
 - 312% Growth -> 99.9% Platform Uptime
 - 100% Live -> Prototype 1.0 (India/Zerodha) Operational

- **Footer:** "We have proven the core tech. We are raising \$5M to build the production platform."

Slide 25: Real Journeys, Real Alpha

- **Current Content:** Fake case study of "Raj Kapoor" with "\$142k" in gains.
- **Status:** ✗ [DELETE]
- **Problems:** Fraudulent. Instantly kills the pitch.

Slide 26: This is Not a Concept

- **Current Content:** (Old Slide 24 - "This is Not a Concept").
- **Status:** ✓ [KEEP AS-IS]
- **Action:** This slide is perfect. It *shows* the live Zerodha integration and production stack. This is our *real* proof. Keep this exactly as-is.

Slide 27: Live Traction Dashboard

- **Current Content:** (Old Slide 25 - "\$42.8M AUM," "27 Active Clients").
- **Status:** ✗ [DELETE]
- **Problems:** The most dangerous slide in the deck. All fake data.

Slide 28: Why We Win (Competitive Matrix)

- **Current Content:** (Old Slide 26 - 2x2 Matrix).
- **Status:** ✓ [KEEP & ENHANCE]
- **Action:** This 2x2 matrix is perfect. It correctly shows us as "High AI + Global Access" and Arta as "High AI + Domestic Only."
- **Tweak:** Add a callout: "**Arta is B2C-only. Our Hybrid GTM, launching with a B2B2C channel via Ascendum, is a 'Blue Ocean' they cannot access.**"

ACT 5: THE BUSINESS & THE ASK (Slides 29-34)

Objective: Detail the market, team, and the \$5M ask.

Slide 29: ACT 5 - The Business & The Ask

- **Current Content:** (Old Slide 30 - "The Business" title card).
- **Status:** ✓ [KEEP AS-IS]

Slide 30: A Massive, Combined Opportunity

- **Current Content:** (Old Slide 31 - TAM/SAM/SOM).
- **Status:** ✓ [KEEP AS-IS] (Numbers are defensible).

Slide 31: ● [NEW SLIDE] - Go-to-Market & Target Customer

- **Current Content:** (Old Slides 32-37 - Personas, Journey, etc. previously marked for deletion).
- **Status:** ● [REPLACE & CONSOLIDATE]
- **Action:** This new slide clarifies our Hybrid B2B2C model and brings back the B2C personas.
- **New Content:**
 - **Title:** Go-to-Market: A Hybrid B2B2C Strategy
 - **Top Section: Our Target Customer (The "Who"):**
 - The Tech-Savvy HNW/NRI: (e.g., "Arjun, \$25M Net Worth"). This is our B2C target. They are underserved, want India access, and are drowning in alt-asset paperwork.
 - **Bottom Section: Our Acquisition Channels (The "How"):**

1. **Channel 1 (B2C - The "Scale"):** Direct-to-Consumer marketing (content, webinars, partnerships) targeting the "Arjun" personas who find us directly (the Arta model).
2. **Channel 2 (B2B2C - The "Wedge"):** The Vora/Ascendum KPS network. We arm CPAs with ARIA as a "Sidekick" to win *their* HNW clients.
 - **Key Takeaway:** "Our B2C vision is our long-term scale. Our B2B2C channel is our credible, low-CAC *launch strategy* that de-risks the seed round."

Slide 32: Financial Projections (Pro-Forma)

- **Current Content:** (Old Slide 41 - "Unit Economics").
- **Status:** ● [REFRAME]
- **Problems:** Based on fake data.
- **New Content:**
 - **Title:** Pro-Forma Projections (Post-Seed Round)
 - **Key Assumptions:** "Our model is a hybrid. We project a Year 1 acquisition mix of 70% from our low-CAC B2B2C (CPA) channel and 30% from our B2C (Direct) channel."
 - **Year 1 Goal (Post-Seed):** 50 CPAs Onboarded + 100 Direct B2C Clients -> ~500 HNW Clients Total -> \$200M AUM -> \$1.5M ARR.
 - **Year 3 Goal:** 500 CPAs + 1,000 B2C Clients -> ~5,000 HNW Clients -> \$2B AUM -> \$15M ARR.
 - **Footer:** *These are projections pending execution of our \$5M seed round.*

Slide 33: Our Team & Strategic Partners

- **Current Content:** (Old Slide 55 - "Team").
- **Status:** ● [MAJOR EDIT]
- **New Content:**
 - **Column 1: Founders:** [Your Name/Co-founders] with clear, *accurate* backgrounds (e.g., "Ex-Google, AI/ML").
 - **Column 2: Strategic Partners (Vora Ventures):** Sachin Shah (Partner, Vora Ventures). Mahendra Vora (Chairman, Vora Group). "Our exclusive partners providing the GIFT City license and Ascendum CPA network."
 - **Column 3: Key Hires (Fundraising For):** Head of Sales (to manage CPA channel), Head of B2C Marketing.
 - **Column 4: Key Advisors (Seeking):** Former SEC Commissioner, ex-CTO (Arta/Addepar).

Slide 34: The Ask (\$5M Seed Round)

- **Current Content:** (Old Slide 57 - "The Ask").
- **Status:** ✗ [MAJOR REWRITE]
- **Problems:** Falsely claims "\$1.5M Prior Commitments."
- **New Content:**
 - **Ask:** Raising **\$5,000,000** Seed Round.
 - **Use of Funds (40%):** Product & Engineering: Build the production-grade "**ARIA Data Engine**" (Phase 2) and Alpaca/IBKR integrations (Phase 3).
 - **Use of Funds (35%):** GTM (B2B2C & B2C): Hire B2B sales team (for CPA channel) *and* B2C marketing team (for direct acquisition).
 - **Use of Funds (25%):** Legal & Compliance: SEC/RIA registration, SOC2 audits.
 - **Milestones (18 Months):**

- Secure SEC RIA License.
- Onboard first 50 CPAs (B2B2C) & 100 HNW clients (B2C).
- Launch "India Gateway Fund" (Phase 1) & **"The ARIA Data Engine"** (Phase 2).
- Reach \$200M AUM.

ACT 6: REDUNDANT / APPENDIX (Slides 35-94)

Objective: Purge all redundant slides and move all deep-dive tech into a "Due Diligence Appendix."

- **Slides 35-53 (Old Case Studies, Customer Journeys, etc.):**
 - **Status:** ✗ [DELETE FROM MAIN DECK]
 - **Action:** These are all based on the old, fake B2C traction. They are irrelevant and damage credibility. Delete entirely. *The B2C Personas are now consolidated in the new Slide 31.*
- **Slides 57-66 (Old "GIFT City" Act):**
 - **Status:** ✗ [DELETE FROM MAIN DECK]
 - **Action:** This entire act is redundant. We have already integrated the *essential* information (the Vora/AIF partnership) into our main "Moat" slides.
- **Slides 67-94 (Old "Product Appendix"):**
 - **Status:** ✓ [KEEP... AS APPENDIX]
 - **Action:** This is excellent technical validation! Re-label this section as **"APPENDIX: ARIA's "AI Brain" Deep Dive."**
 - Chapter 1: Zerodha... -> **Appendix A: Prototype 1.0 (India Tech Validation)**
 - Chapter 2: CGMF... -> **Appendix B: "AI Fund Manager" (Spark/Jarvis Model)**
 - Chapter 3: Agentic AI... -> **Appendix C: ARIA's Core Architecture**
 - Chapter 7: Sentiment... -> **Appendix D: ARIA's RAG/Data Pipeline**

FINAL SUMMARY OF CHANGES

1. **Narrative Changed:** From a fake B2C app to a credible **"Hybrid B2B2C"** strategy, leading with the B2B2C channel as the launch wedge.
2. **Brand Created:** The "AI Committee" is now **ARIA**, the "virtuoso orchestrator."
3. **Traction Purged:** All fake traction is **removed** and replaced with *real* prototype metrics.
4. **Moats Clarified:**
 - The "Jarvis/Spark" tech is now the **"AI Fund Manager"** for the AIF.
 - The Vora/GIFT City AIF is the **"India Gateway Fund" (Phase 1)**.
 - The Vora/Ascendum network is our **"B2B2C GTM Wedge" (Phase 1)**.
 - "Alt Assets" is now **"The ARIA Data Engine" (Phase 2)**, which is the foundation of our "Family Office OS."
 - "Tax Alpha" is now the **"US AI Advisor" (Phase 3)**.
5. **Customer Slide Added:** A new **"Go-to-Market & Target Customer"** slide is in Act 5, clarifying our hybrid model.
6. **US Tech Strategy Added:** A new **"Read vs. Execute"** slide (Slide 23) is in Act 3, clarifying the Plaid vs. Alpaca/IBKR model.
7. **Deck Shortened:** The main investor pitch is reduced from 94 slides to a tight **~34 slides**, with the rest moving to a "Due Diligence Appendix."
